Gen Engelman M.D.

3003 Trust St. St Louis Mo.

Dr Sir: Please don't think
I have forgotten your request I
have gathered over a pile of the
acorns & with the result of
only 4 good ones. I begin to
suspect that we have only
found what the Squirrels
rejected - however I will send
you a little parcel of them with
the leaves so you will be sure
of the kinds selected - unfortunately
I am not sure of the leaf you
showed me & I find three kinds with
long middle points - if none of these
suit prove to be what you want
will try again next year for you.

(D. V.).

Very sincerely

R. O. Sweeney.

I cannot explain why Wislizenus
should use the common phrase "Alkali
water" except from its universal use
in the northern part of the State & we
out of that region - suppose it to be such
as I had not read the report did
not notice the analysis. Thank you
for printing it out to me -
